1320 N/A Shootout

¼ Mile

.500 Pro Tree

Racer will select his/her own index and will use that index throughout eliminations. Once index is declared, before the first round, it must stay the same for all rounds.

This class is open to any Late Model Gen3 Hemi that is a Dodge 1320 package car. Cars are not allowed any power adder (nitrous, turbo, or blower). This is a great class to showcase the 1320 package and other Late Model N/A cars from Dodge.

Eliminations will be Random pairings until 8 cars. At 8 cars, the ladder will be created by reaction time of the previous elimination round. Potential bye run during random pairings, is decided by best Positive reaction time (r/t) in the previous round. Racer closest to ".000" based on a Pro .500 Tree. ".000" is considered perfect. For cases in which identical reaction times are made, qualifying position will be based on a first-come first served: the first occurring r/t will be placed #1, the second occurrence of said r/t will be placed #2, and so on.
